Education

- **Master of Science in Computer Science**
  University of Washington
  Graduation: June 2023
  GPA: 3.9/4.0

Skills

- Programming Languages: Python, Java, C++
- Machine Learning: TensorFlow, PyTorch, Scikit-learn
- Cloud Platforms: AWS, Google Cloud
- Tools: Git, Docker, Jenkins

Experience

- **Machine Learning Intern**
  Microsoft, Redmond, WA
  June 2022 – August 2022
  - Built a recommendation system using collaborative filtering.
  - Improved model accuracy by 20% through hyperparameter tuning.
  - Deployed the model on Azure.
- **Research Assistant**
  University of Washington
  September 2021 – May 2022
  - Conducted research on computer vision and image processing.
  - Published a paper on object detection in academic journals.

Projects

- **Image Classification**
  - Developed a deep learning model to classify images using TensorFlow.
  - Achieved 95% accuracy on the test dataset.
- **Stock Price Prediction**
  - Built a time-series forecasting model using LSTM.
  - Deployed the model as a web app using Flask.
